SUMMARY

Full-stack web developer experienced with MySQL, JavaScript, TypeScript, React, Next.js and PHP .Contributed to and maintained a live production platform serving 68,000+ users, developing CRM features, admin panels, role-based functionality, payment-related integrations, and production improvements

EDUCATION

National Institute of Technology, Jalandhar
B.Tech in Instrumentation and Control Engineering

2024 – 2028
CGPA: 8.30

EXPERIENCE

Web Developer Intern · Champions 11 Cricket League (C11CL)

June 2026

Production sports-tech platform for nationwide cricket trials · PHP, MySQL, JavaScript

- Contributed to the development and maintenance of a live PHP/MySQL platform handling 68,000+ trial registrations across 23 states, developing CRM modules, admin panels, role-based features, and production enhancements.
- Integrated Razorpay with webhook handlers and cron reconciliation to auto-resolve failed and duplicate transactions.
- Developed a role-based CRM and admin panel — single/bulk lead assignment, referral auto-ownership, salesperson dashboards, and access control.
- Engineered a gated auction module (identity verification, one-time submission, rate limiting, image compression) with an admin review panel.

Freelance Web Developer · NPS Insurance

July 2026

Independent client engagement · Next.js 14, TypeScript, PostgreSQL, Prisma, Tailwind CSS

- Designed and delivered a **multi-provider insurance aggregator** spanning 13 product lines and 31 IRDAI-registered providers.
- Built **dynamic category, provider and policy pages** in the Next.js App Router with ISR caching and per-page SEO, backed by PostgreSQL and Prisma.
- Developed a **role-based admin panel** (four roles, per-provider data scoping) for providers, policies, leads, renewals and blog content.
- Owned the engagement end to end — requirements, schema design, build and deployment.

PROJECTS

Splitease · Expense Splitting Web Application · [GitHub](#) | [Live Demo](#)

- Built a Splitwise-inspired application for group-based expense tracking and settlement with secure JWT authentication.
- Implemented real-time balance updates with efficient database operations and a clean, responsive UI.

Krishi Mitras · Farmer-Focused Agricultural Platform · [GitHub](#)

- Developed a **Next.js platform** delivering real-time agricultural insights to farmers.
- Implemented **Firebase Authentication** with secure session management, and integrated the OpenWeatherMap API for location-based forecasts.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, C++, Python, SQL

Frontend: HTML, CSS, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, PHP, REST APIs, Authentication (JWT / Sessions)

Databases: MongoDB, MySQL, PostgreSQL, Prisma

Cloud & DevOps: Vercel, GitHub Actions, CI/CD

Tools & Platforms: Git, GitHub, VS Code, Postman, Razorpay, Firebase, Hostinger/cPanel

Core Concepts: Data Structures & Algorithms, OOP, REST API Design, Payment Integration

Coding Profiles: LeetCode (150+ solved) — leetcode.com/u/AryanSri_235
